

Description.

MODA DMX SPLITTER 8 is a rack mount DMX 512 hard wired splitter for multiple runs of DMX data. Eight hard wired ports on the rear of the unit for eight separate runs. Unit allows for one hard wired DMX 512 input with one hard wired re-output DMX output to wire to next location or splitter(s). Maintains DMX signal by boosting all weak signals to its original output. Helps to revive the signal before it becomes too weak to be read by DMX enabled devices. Can be linked to up to 128 MODA SPLITTER 8's for large installations. Designed and developed by MODA LIGHT, Las Vegas USA.

INPUT

DMX 512 Input	1
Electrical Power Source	100-240v AC, 50/60Hz
Power Consumption	10w Max
Max. Transmission Distance	300m Max

OUTPUT

DMX 512 Output	1
Isolated DMX 512 Output	8
Max. Number of Each Output	128

CLASSIFICATION

Class	1
RoHS	Compliant

PROTECTIONS

Short Circuit	Yes
Overload Protection	Yes

PHYSICAL

Dimensions	18 9/10" x 5 4/5" x 1 2/5" (482mm x 148mm x 37mm)
Weight	2.5 lbs (1,134g)
