**MODA LIGHT® , DOMINATING THE PIA AWARDS.**

Las Vegas, NV — MODA LIGHT, a rapidly growing lighting manufacturer and leader in the specification grade LED lighting industry are proud to announce that they have been awarded four Product Innovation Awards (PIA). In its seventh edition, the Architectural SSL Product Innovation Awards determine and honor the most innovative LED and Solid State luminaries in the market. This time honoring Moda Light's renowned technology and advanced product engineering.

The recognition for industry leading technology was awarded to MODA GLOWDIM® and MODA BRIDGE®. GLOWDIM allows fixtures to mimic incandescent lighting by transitioning from 2700K at 100% down to 1800K when dimmed. Allowing spaces to be completely transformed into warm and welcoming environments. Also awarded, MODA BRIDGE enables electronic low voltage (ELV) fixtures to be controlled by 0-10V dimmers. Allowing easy installation of Moda's high performance fixtures without complicated wiring.

Awarded for their advanced product design and engineering, NANO COVE® and NANO GRAZE® are new products in MODA LIGHT's portfolio. These products incorporate state of the art driverless technology, which decreases their footprint making them perfect for small spaces.

"These products have been created out of understanding the needs of the lighting industry" said Mark Samson, CEO of MODA LIGHT. "By carefully researching and listening to the feedback of our customers we have better understanding of the gaps within this industry. This makes easier to determine what is essential in our products."

###

**About Moda Light**

Moda Light, an award winning manufacturer, was formed in 2006 by Mark Samson who has over 34 years of experience in the Lighting and SSL industry. Presently located in the 24-hour city, Las Vegas, Nevada, we stand prominently in the SSL industry, thriving on the challenges of things considered "impossible". We create truly new and original lighting technology, manipulating and inventing new hardware and software to produce what was once considered inaccessible data from LED products.

**About Architectural Products Magazine**

The Architectural SSL Product Innovation Awards (PIA) determine and honor the most innovative LED/ solid-state luminaires and fixtures on the market, while also recognizing the companies behind the components that make up these light sources. The PIA program also recognizes leaders in categories ranging from those conducting cutting-edge R+D, to those helping in the development of standards as well as those pushing to make solid-state lighting a truly sustainable technology.
